

## CROPLIFE SOUTH AFRICA AGRICULTURAL REMEDIES DATABASE

### DISCLAIMER

#### IMPORTANT NOTICE TO ALL USERS OF THE DATABASE

CropLife South Africa cannot be held responsible for the correctness of the information reflected in this database. The information must be used only as a guideline to the agricultural remedies that are registered in South Africa and does not replace the information contained in the labels of such agricultural remedies. CropLife South Africa endeavours to present the information as accurately as possible but strongly advises all users of the database to consult the labels of the individual agricultural remedies or to consult the relevant registration holders for the legally correct information.

#### IMPORTANT NOTICE TO ALL REGISTRATION HOLDERS OF AGRICULTURAL REMEDIES

CropLife South Africa is hosting this comprehensive database with agricultural remedies that are registered by the Registrar of Act No. 36 of 1947. This database is an aid to registration holders, farmers, consultants, agricultural chemical distributors, regulatory authorities, students, environmental health practitioners and others who may from time to time require basic information about agricultural remedies in South Africa. The data was collated by a consultant for AVCASA and the database will be updated with new information on a monthly basis. All registration holders of agricultural remedies are hereby requested to support the continued management and updating of the database by submitting any label amendments, newly registered products, cancellations, withdrawals or any relevant changes to the consultant Kathy van Zyl on [kathy@tsunami.co.za](mailto:kathy@tsunami.co.za) as soon as these *HAVE BEEN APPROVED* by the Registrar. Best practice is to e-mail a copy of the new *APPROVED* label to Kathy or if a letter was received from the Registrar to cancel a product then this letter will suffice. It is in your company's interest to ensure that the data is updated on a regular basis.
