Contaminated pesticide containers are classified as hazardous waste.

99.9997% of pesticide is removed by triple-rinsing.

Triple-rinsing is a solution to prevent accumulation of hazardous waste.

Gekontamineerde plaagdoderhouers word as gevaarlike afval beskou.

99.9997% plaagdoder word met drie-maal-spoel verwyder.

Driemaal-spoel is 'n oplossing om die opbou van gevaarlike afval te voorkom.

Driemaal-spoel Brosjure**

Pesticide containers are triple-rinsed in order to:

- recover and use the total volume of pesticide that was paid for.
- change the container from a hazardous to a non-hazardous commodity.
- make it suitable for transportation and recycling.

Only triple-rinse containers after decanting the last bit of pesticide into the spray tank.

1. Add a quarter of the container volume of fresh water, agitate and decant into the spray tank.
Do this three times.
2. Dry the container.
3. Puncture or cut it into quarters.
4. Contact a CropLife SA approved collector/recycler to dispose of the containers.

A list of approved collectors and recyclers is available on www.croplife.co.za

These containers, even if triple-rinsed, may not be:

- buried on the farm.
- burned on the farm.
- re-used as containers.
- sold or given away for any other purpose.

THEY MUST BE RECYCLED

WHY AND WHEN HOEKOM EN WANNEER

Plaaagdoderhouers word drie maal gespoel om:

- die totale volume plaagdoder waarvoor jy betaal het, te herwin en te gebruik.
- die houer van 'n gevaarlike na nie-gevaarlike kommoditeit te verander.
- dit geskik vir vervoer en herwinning te maak.

Spoel die houers drie maal nadat die laaste bietjie plaagdoder in die spuit-tenk oorgegiet is.

HOW AND WHERE HOE EN WAAR

1. Voeg 'n kwart van die houer-volume vars water by die houer, skud en giet oor in die spuittenk.
Doen dit drie keer.
2. Droog die houer uit.
3. Sny dit in kwarte of steek gate daarin.
4. Kontak 'n CropLife SA goedgekeurde versamelaar/verwerker om van die houer ontslae te raak.

'n Lys van goedgekeurde versamelaars en verwerkers is op www.croplife.co.za beskikbaar.

DON'T MOENIE

Hierdie houers, al is hulle drie maal gespoel, mag nie:

- op die plaas begrawe word nie.
- op die plaas verbrand word nie.
- as houers hergebruik word nie.
- as houers vir enige ander doelwit verkoop of weggegee word nie.

HULLE MOET VERWERK WORD
